PROFESSIONAL SUMMARY

Results-driven Final-Year Computer Science Engineering student with comprehensive experience building production-ready full-stack applications and AI-powered web ecosystems. Highly proficient in designing scalable web platforms via the MERN stack, implementing strict architectural security patterns (JWT/RBAC), and optimizing RESTful backend workflows. Proven problem solver with 360+ algorithmic challenges resolved across LeetCode and GeeksforGeeks.

TECHNICAL SKILLS

Languages:	C++, JavaScript, Python, SQL
Frontend:	React.js, Redux, HTML5, CSS3, Responsive Design Layouts
Backend & APIs:	Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)
Databases:	MongoDB, Mongoose ODM, SQL (MySQL)
Tools & Platforms:	Git, GitHub, Postman, VS Code, Vercel, AWS
Core CS:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, OS, Computer Networks

WORK EXPERIENCE

KodBud – AI/ML Developer Intern	Mar 2026 – Apr 2026
• Engineered property recommendation features for the Stayora booking platform to deliver personalized homepage contents. • Integrated backend recommendation logic into user-facing interactive React components to elevate dynamic interactivity.	
CodSoft – Full-Stack Developer Intern	Jan 2026 – Feb 2026
• Built bilateral recruitment pipelines and dashboard features connecting job seekers and recruiters using the MERN stack. • Implemented cryptographic token authentication layers and structured secure end-to-end REST API architecture.	

PROJECTS

Stayora – AI-Powered Accommodation Booking Platform	Live Link
• Architected a full-stack lodging ecosystem featuring secure authenticated booking workflows and review systems. • Developed production-grade REST APIs managing property listings, transactional logs, and profile mutations. • Designed high-fidelity responsive UI dashboards utilizing mobile-first design principles for multi-device cross-compatibility.	
A1 Learner – Personalized AI Learning Platform	MERN Stack Python
• Created an adaptive educational engine that dynamically generates structured topic recommendations based on progress metrics. • Constructed responsive dashboard states using Redux to preserve consistent, centralized, and predictable application flow. • Enforced deep backend data parsing validation layers across data ingestion points to guarantee platform stability.	
HireFlow – Recruitment Management Platform	Live Link
• Designed a multi-portal SaaS product layout cleanly separating distinct recruiter and job seeker permission views. • Deployed custom Role-Based Access Control (RBAC) security frameworks linked with signed JSON Web Tokens (JWT). • Programmed an analytical candidate pipeline tracker to handle multi-stage recruitment updates seamlessly.	

EDUCATION

Shivajirao Kadam Institute of Technology & Management (RGPV) – Indore, MP	Aug 2022 – Jun 2026
Bachelor of Technology in Computer Science Engineering CGPA: 7.0 / 10	
Vidhya Sagar Academy – Madhya Pradesh	2021 – 2022
Class XII (Higher Secondary Education) Score: 90%	

ACHIEVEMENTS & LEADERSHIP

- **Competitive Programming:** Solved 200+ problems on LeetCode and 160+ on GeeksforGeeks (Focusing on Arrays, Graphs, DP).
- **Hackathon Leadership:** Served as elected Team Leader for the SKITM Innothon Hackathon, successfully steering project milestones.
- **Product Deployment:** Designed, version-controlled, and actively maintained 3+ live full-stack web applications.
